GuestCentrix is a modular suite of integrated software solutions that can also operate independently if required.

The GuestCentrix PMS can be extended into large call centre environments with the Central Information System (CIS) and Central Reservations System (CRS); or seamlessly handle strata title requirements with the Trust Accounting module.

Food, beverage and banqueting business units are catered for by the GuestCentrix Point of Sale (POS), Inventory Management and Conference & Banqueting (C&B) systems. Additional GuestCentrix modules include the Web Reservations System, Tour Desk and Digital Dashboard.
