

have your cake and eat it

GuestCentrix POS has an elegant user interface and can be configured to operate in a fine dining 'table service' mode or 'fast bar' mode. A handheld option allows larger operations to drive improved customer service by allowing serving staff to place orders to the kitchen, bar or dispense areas directly from the table when taking the order.

POS FEATURES:

GuestCentrix POS is fast and easy to use, delivering excellent functionality in the outlets while monitoring every transaction at the point of sale.

- Split bill up to twelve ways including shared items
- Pop-up product details and/or preparation instructions for great product knowledge and quality assurance
- Reports by product item, product type, product category, by server, by hour, by outlet, by user-defined date range selection
- Product linking to ensure menu smooth communication between servers and kitchen
- Flexible keyboard design, by colour, font size and function (product, payment, discount or sub-keyboard link)
